
Subjective Souls

Souls and the Mind-Body Problem

Two Motivations for Dualism

- ❖ External
 - ❖ Theism
- ❖ Internal
 - ❖ The nature of mind is such that it has no home in the natural world.

Mind and its Place in Nature

- ❖ 'A society of minds is not a big mind, but a system of bodies (such as the solar system) is just a big body.' (C. D. Broad, *The Mind and its Place in Nature*, p. 32)

What is such that it is both mental and physical?

- ❖ Short Answer:

- ❖ We are.

- ❖ Long Answer:

- ❖ Whatever is such that it may serve as a subject to disparate categories of properties with seemingly incompatible realization requirements.

Property Taxonomies

- ❖ Consider the property of being even (ϕ).
 - ❖ This is evidently a mathematical property.
 - ❖ Necessarily, if x is ϕ then x is a number.
- ❖ Consider the property of metabolizing (ψ).
 - ❖ This is evidently a biological property.
 - ❖ Necessarily, if x is ψ , then x is a living being.

Disparate Categories, Incompatible Demands

- ❖ A simple argument:
 1. If x is ϕ , then x is a number.
 2. If x is ψ , then x is alive.
 3. Necessarily, nothing is such that it is both a number and is alive.
 4. Hence, there is no x such that $(\phi x$ and $\psi x)$.
- ❖ If we grant (3) (and let us), then we are compelled to assent to (4).
- ❖ Is this a problem?
- ❖ No, this is not a problem: we freely recognize disparate property bases.

Mental and Physical Properties: a Contrast

- ❖ The physical:
 - ❖ Not privileged to any subject (amenable to third-person access)
 - ❖ Subject to public confirmation
 - ❖ Quantitative without remainder
- ❖ The mental:
 - ❖ Epistemic
 - ❖ Authoritative
 - ❖ Privileged Access (known non-inferentially by their subjects alone)
 - ❖ Metaphysical
 - ❖ Qualitative: both locally and then again globally
 - ❖ Intentional

Forcing the Contrast

1. Mental properties have the property of being introspectively accessible to their bearers alone (ψ).
2. No physical property has ψ .
3. LL (or, the indiscernibility of identicals).
4. Hence, no mental property is a physical property.

Leibniz's Law

- ❖ Or, more precisely, the Indiscernibility of Indenticals
- ❖ LL: $x = y$ *only if* x and y have all of their properties in common
 - ❖ So, e.g., if the Commander in Chief of the Armed Forces (CC) = The President of the United States (P), then whatever is true of (CC) is true of (P) and whatever is true of (P) is true of (CC).
 - ❖ Conversely, if the murderer, whoever that may be, has O+ blood, and the butler has B-, then the butler is not the murderer.

A Problem?

- ❖ Well, so far, we may accept that there are bearers of mental properties and bearers of physical properties.
 - ❖ That is not a problem.
- ❖ We may further accept that the bearers of mental and physical properties are disjoint.
 - ❖ That is not a problem.
- ❖ Yet (recall the easy response): we are committed to the view that we are the bearers of both mental and physical properties.
 - ❖ That is a problem.

A Mind-Body Problem

- ❖ We seem committed to the view that mental and physical properties require different sorts of subjects.
- ❖ We seem equally committed to the view that we are ourselves subjects to both sorts of properties.
- ❖ Hence the problem: we think that mental properties must be borne by physical subjects (to wit, ourselves) and yet we cannot regard them as able to be borne by such subjects. Thus we are, and cannot be, the subjects of mental states.
- ❖ N.b.: This is not a problem for your average theist: she actively believes that mental subjects and physical subjects are not only discrete, but necessarily so.

Two Solutions to this Mind-Body Problem

- ❖ Dualism: Properly speaking, there is no single subject of mental and physical properties.
 - ❖ Minds (souls) are subjects of mental properties.
 - ❖ Bodies are subjects of physical properties.
- ❖ Identity Theory: The mind *is* the brain (or, the brain and central nervous system).
 - ❖ Mental properties are identical with physical properties.
 - ❖ There is no categorial difference because, in fact, there is no difference; arguments to the contrary are mistaken.

The Identity Thesis

- ❖ The Identity Thesis: every mental state is identical with some physical state.
 - ❖ E.g., every pain state is identical with some neural state; every thought is identical with some neural state; and so on.
 - ❖ In some sense, IT seems simple and natural.
 - ❖ Why doubt it?

A Plausible Hypothesis

- ❖ Indeed, one may simply observe that physicalism is the most natural, most plausible hypothesis available: minds are like other parts of the physical world.
- ❖ So, when we approach the mind, we should approach it like any other part of the physical world, namely by means of empirical investigation into its operations and nature.
 - ❖ Just as we discovered that lightning is the same as a discharge of electricity or that water is H₂O, so we will discover that mental events are neural events.

Descartes' Dualism

1. I can doubt that my body exists. (That is, more clumsily: my body has the property of being able to be doubted by me as to whether it exists.)
2. I cannot doubt that I exist. (That is, again more clumsily: I lack the property of being able to be doubted by me as to whether I exist.)
3. LL
4. So, I am not identical with my body.

Certainty

1. I may be certain of my own experiences, when I have them. (For example, I may be certain that I am in pain, when I am in pain.)
2. I cannot be certain of my own physical states, including my own brain and neuro-physiological states. (Indeed, humans knew they were in pain long before anyone had ever heard of a neuro-physiological state.)
3. LL
4. So, my experiences are not physical states of any kind.
 - ❖ That is, to put it clumsily: my mental states have the feature of *being known with certainty by me that they exist*, whereas my brain and neurophysiological states lack this feature.

Some Terms

- ❖ Let *reductive physicalism* be the thesis that mental events exist, but are identical with first-order physical events (presumably events in the brain and neural system).
 - ❖ Mental events are like lightning and water. There is lightning: lightning is identical with such-and-such a discharge of electricity. There is water: water is identical with H₂O.
- ❖ Let *eliminativism* be the thesis that there are no mental events.
 - ❖ There seem to be mental events, but in fact there are none.
 - ❖ Mental events are like witches. Witches are not, as it happens, women who suffer from epilepsy. Rather, *there are no witches*. People who thought otherwise were simply wrong.

A Problem for Physicalism?

1. If physicalism is true, then all of reality can be characterized in objective terms.
2. There are (or seem to be) subjective facts, including perspectival and experiential facts.
3. So, if physicalism is true, either (i) these (seemingly) subjective facts can be reduced to physical facts, or (ii) these seemingly subjective facts are not facts at all. [This is to say either: (i) reductivism or (ii) eliminativism.]
4. Subjective facts cannot be reduced to physical facts.
5. Subjective facts cannot be eliminated.
6. So, physicalism is false.

Doleful Angels?

Angel of Grief, William Wetmore Story

At once as far as Angels kenn he views
The dismal Situation waste and wilde,
A Dungeon horrible, on all sides round
As one great Furnace flam'd, yet from those flames
No light, but rather darkness visible
Serv'd onely to discover sights of woe,
Regions of sorrow, doleful shades, where peace
And rest can never dwell, hope never comes
That comes to all; but torture without end
Still urges, and a fiery Deluge, fed
With ever-burning Sulphur unconsum'd
Milton, *Paradise Lost* i 59-69
